

## PRESS REBUILDS

### A VIABLE SOLUTION IN THESE TOUGH ECONOMIC TIMES.

Hull Industries can rebuild your existing press to improve its productivity. More parts molded per shift means more money added to your bottom line.

- Replace/repair existing hydraulics.
- Make sure press meets current OSHA safety standards.
- Upgrade controls, new PLC and color touch screen operator interface.

Call us today to discuss rebuilding your press – 215-230-4260.

## PRESS AND VACUUM IMPREGNATION SYSTEM SELECTION CHECKLISTS

We make it easier for you to decide what you need for either your press or vacuum impregnation application.

View our checklists online

- Press Selection Checklist.
- Vacuum Impregnation Checklist.

These will guide you thru the selection process. Once you have completed the checklist either e-mail it or fax it to us.

E-mail: [info@hullindustries.com](mailto:info@hullindustries.com) Fax: 215-230-4261

If you are not sure what you need, give us a call 215-230-4260.

We have over 55 years of experience working with our customers; let us help you select the right equipment for your application!
